

CHAPTER 23 | Synchronicity

Synchronicity is experienced when there is 'more than just coincidence'. This happens when two or more events occur more or less simultaneously and are related to each other for you, without one event being the direct result of the other. Synchronicity is about energies that intersect without you having to do anything. For example, this book may well have come into your life through synchronicity. What seeming coincidences underlie this? What is going on in your life right now? What answers are you looking for? Synchronicity is an expression of the infinite organizational capacity of the universe. Deepak Chopra calls it "the unified field. Synchronicity is related to fulfilling your desires in an effortless manner. Coincidence is real; it belongs to you because it has meaning for you. Everything happens for a reason. When someone cancels an appointment, it means that it is not yet the right time to meet this person. Accept this. Don't resist. Cooperate in rescheduling the appointment. In due course, you will understand the reason why the meeting was cancelled and what miracle has replaced it. If you pay close attention, you will see seeming coincidences and miracles pass you by all day. You just have to be able to recognize them and be open to them. They are signals that inspire and support you in giving direction to your life.
